

This is a set of 5 fermenting silos.

Each silo accepts chaff, sugar beet, straw, hay, or grass.

Fermenter

Produces simply silage.

Fermenter Digestate

Produces silage with a byproduct of digestate.

Fermenter Fertilizer

Produces silage with a byproduct of fertilizer.

Fermenter Fuel

Produces silage with a byproduct of fuel.

Fermenter Liquid Fertilizer

Produces silage with a byproduct of liquid fertilizer.

Credits:

Without the awesome fabrik script these silos would not be possible. Marhu and kevink98 are responsible for the script. Many great mods along with the fabrik.lua can be found on marhu.net.

The cement pad used for the base of the silos are from the potato washer which is also a marhu mod.

The silo spouts are copied from a FS15 map by the name of Manchester. The maker of that map is Reaper9111.

As always feedback is appreciated. If you encounter any issues please feel free to contact me. I thank all my twitch viewers for information they share and the ideas they inspire.

With their help I am able to edit and put these pieces out there for you to enjoy.
